

Experts In  
**Health & Independence**

Residential Home Health is a nationally recognized market leader in home nursing and therapy services.

## What Is Home Health Care?

Home health care involves a range of health care services that can be provided wherever home may be. Also known as 'skilled care,' home health care is designed to help you gain independence and remain safe at home as an active community member.

### People turn to home health care for help with:

- Transitioning from a hospital or nursing facility, to remain stable and stay at home
- Managing chronic conditions like diabetes, CHF, or COPD
- Rehab after joint replacement or other surgery
- Adapting to new mobility challenges, and home safety and falling hazards
- Caregiver support and strategies for living with cognitive decline

## Medicare Coverage

Home health care is covered 100% for eligible Medicare beneficiaries. Call a Home Care Specialist today to find out if you qualify.

**(866)902-4000**

## Is Home Health Care Right For Me?

If any of these sounds familiar, you might benefit from home health care:

- ✓ New diagnosis, or recent difficulty with a chronic illness
- ✓ Trouble completing routine tasks for disease management
- ✓ New medications, or juggling 3 or more medications
- ✓ Recent fall, or a close call/fear of falling
- ✓ Feeling weaker than before, or less able to do daily tasks
- ✓ Pain that interferes with daily activities
- ✓ Difficult or not possible to leave the house

## Meet Your Health Goals At Home

In collaboration with your doctor, Residential Home Health provides extensive services and programs to give you personalized support for your specific health challenges and goals.

# Making The Right Choice

If you are considering other providers, make sure your choice has all the advantages to get you the best possible care.

## Do they have the Residential difference?

- Accredited and recognized within the industry?
- Hiring their own nurses and therapists instead of contract workers?
- Able to start your care quickly?
- Scheduling patient visits 365 days a year?
- Working with your current doctors to give you consistent care?
- Available 24/7 with a nurse to answer your questions?
- Emergency-ready at the touch of a button?
- Ready with additional services — like pain and symptom management or hospice support — if your care needs should change?
- Addressing your specific health challenges with proven programs?
- Monitoring your vital signs with 'telehealth' technology?
- Has dedicated Transitional Nurse Liaisons to help you make a smooth transition home?

## Meet Residential's Home Health Care Team

Nurses evaluate, educate, coordinate, and communicate among care providers, the home health care team, and patients and their families.

Physical therapists lead exercises that help build strength and balance for better safety and self-sufficiency at home.

Occupational therapists teach personalized adaptations for performing daily activities more safely and independently.

Speech therapists assist with motor speech disorders, swallowing difficulty, and loss of language/cognition.

Medical social workers help patients and families address their unique needs and personal goals while coping with health challenges.
